

The background of the slide is a photograph of a mountain range. The mountains are layered, with the closest peaks in the foreground being a darker blue and the subsequent ranges receding into the distance, becoming progressively lighter and more hazy. The sky is a pale, uniform blue, suggesting a clear or slightly misty day. The overall color palette is monochromatic, consisting of various shades of blue.

CMS

Mike

Kaydon

Steven

Favorite part

- Search on database
- Being able to create dynamic body, header, and footer items
- Doing partial views was so much better than trying to dynamically do stuff otherwise
- Users Roles
 - Power to limit people Mwahaahaha

Challenges

- Following MVC
- Getting out data structures to work with the main page creation
 - We tried getting header items from parent ids, then found making lists worked much better
- Work breakdown structure organization

Take Aways

- Always have someone smarter than you in the group, or try to be that guy
- Stay Patient, remain calm and trust the design
- Don't fight Asp.net core
 - Follow the pattern set up
- Think through your data structures before you write them in code

What we would do differently

- Start with a detailed plan
- Use debugging tools better
- Create cleaner breakdown structures
- Plan more with the group so everyone is on the same page
